- From the RBT VOR, fly heading 045° direct to the Charles de Gaulle Airport (LFPG). If you are flying online, obtain the necessary clearance for landing at LFPG. For an extra challenge, try to find the Champs d'Elysee and overfly it! (This is the endpoint of the Tour de France Race).

To conclude the route briefing, we encourage you to consider the following challenges:

- 1. Try to do this tour VFR. Since it is required to use the DHC-6 Aircraft, you will not be limited to IFR only, and flying VFR would allow you more flexibility to visit and see all the stops along the way (even if you aren't landing there).
- 2. Feel free to deviate slightly from the given routes. These routes are given to provide a general direction to fly in order to follow along the tour, but they are by no means an exact replica. Be sure to utilize the links provided to find visual references to use along the way and use them to customize your tour experience!
- 3. Most importantly: Have fun with this tour! The main purpose behind our tours is to provide challenges and fun routes to our pilots.

<u>WEATHER</u>

Weather on this tour will be at the Pilot's discretion. For a challenge, use Real World Weather and try to remain VFR throughout the tour. However, if the weather is extremely bad during any time or if you would rather control of it, you may set it however you like. Since this tour takes place across an entire month, it is impossible to provide weather details in advance, so keep an eye out for METARS and TAFS! <u>https://www.skyvector.com/</u> is a great resource!

Time may also be at the Pilot's discretion. For this tour, we highly recommend setting the time to "Day" in order to make the most out of the tour! Feel free to deviate if you like however as we will not be grading what time of day you perform your flights!

CONCLUSION

Congratulations! You have made it through the Tour de France 2022 Tour! We hope you enjoyed flying it and hope you will join us again in our other tours! If you enjoyed this tour, or if you have any questions, comments, or concerns, please tell us your feedback! Let us know what you liked, what you didn't like, and what you would like to see in the future!
